Sifted due to:
 * structural unsoundness on front pasterns
 ** structural unsoundness on front and rear legs
 *** structural unsoundness of the goat's front end
 **** failure to meet the minimum required visual score of 2

Visual Score Key: 5-Outstanding 4-Good 3-Average 2-Fair 1-Poor

NOTE: All bucks have been bled and tested for brucellosis and tuberculosis. All tests were negative. Health papers will be available for out-of-state transport.
The four bucks in bold and/or highlighted are in the Top 30% of the bucks based on performance, have met the minimal requirements for structure and soundness, and will be designated for sale through the NC Meat Goat Performance Buck Test Sale. All other bucks are available for purchase by private treaty with the breeder.
