

# 2000 North Carolina Fall Feeder Calf & Yearling Cattle Sale Summaries

Feeder cattle production is an important beef enterprise in North Carolina. Graded sales continue to be viable alternatives for marketing these cattle and increasing profits for producers who choose to participate. These sales were initiated in North Carolina in 1952 and have operated each year since that time.

All cattle sold through these sales are graded by trained personnel from the Marketing Division of the North Carolina Department of Agriculture. Cattle are commingled in uniform lots of grade, sex, and breed, and penned with similar cattle in 100-pound increments. Steers sold through these sales must be properly castrated and healed, and all horned cattle must be dehorned and healed. Feeder calves must be vaccinated for Blackleg and Malignant Edema.

The following USDA Feeder Cattle Grade standards are used:

- L-1 -Large frame cattle with average or better thickness
- M-1 -Medium frame cattle with average or better thickness
- S-1 -Small frame cattle with average or better thickness
- LMS-2 -Variable in frame size with less than average thickness

Weights at which animals of various grades are expected to produce a Choice carcass are as follows:

<b>Frame Size</b>	<b>Heifers</b>	<b>Steers</b>
<b>L</b>	<b>1000 and up</b>	<b>1200 and up</b>
<b>M</b>	<b>850 - 1000</b>	<b>1000-1200</b>

**RE:** 2000 Fall Feeder Calf and Yearling Sale Summaries

A total of 15,689 feeder calves were sold in 17 sales, while only 294 yearlings were sold this fall across North Carolina. These sales are designed to provide a marketing outlet for small to medium sized beef operations, where producers can co-mingle their calves into larger, uniform lots of similar type cattle. Increased lot size is critically important in the current beef cattle marketing system. It is interesting to note the consistent decline in the number of yearling cattle sold through this system where over 15,600 head of yearlings were sold in 16 sales in 1978. Graded sales were initiated in North Carolina in 1952 and have remained a viable marketing alternative for commercial producers since that time.

Please note that several sales now combine black and black/white-faced crosses in order to increase lot size and these pens are included in the breed called "Blacks". This change has reduced the percentage of cattle called "B&W Face" and has increased the percentage of cattle called "Blacks". Also note that most sales now include L-1 cattle with M-1 cattle for the same purpose and this change has reduced the percentage of cattle in the L-1 grade and increased the percentage of cattle in the M-1 grade.

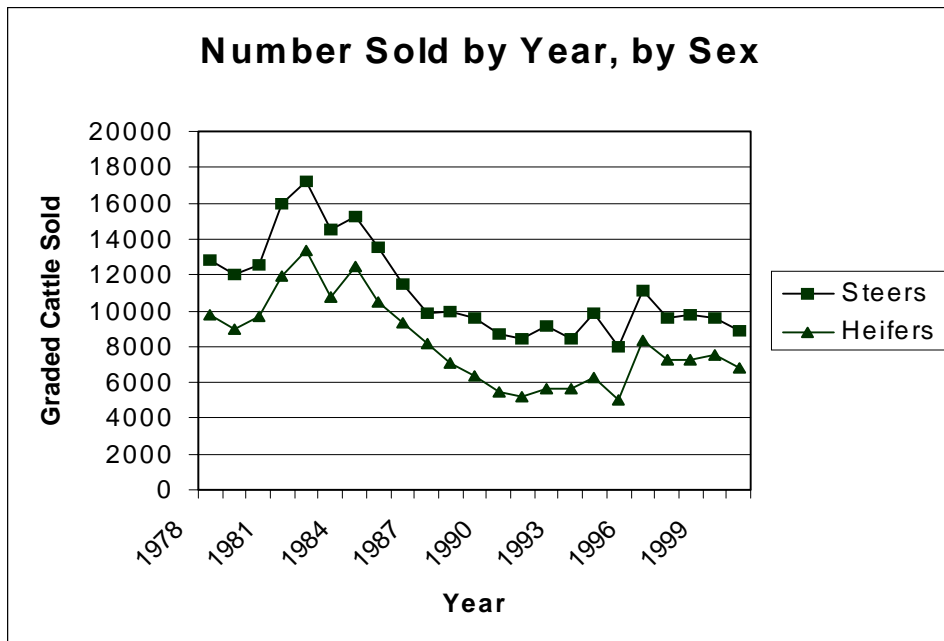

At the conclusion of the frequency tables for feeder calves is a summary of weekly auction sale prices for sales held in the same time frame as the graded sales. Also included is a comparison of the two sale types demonstrating the significant per-head premiums associated with graded sales.

The following table details numbers of feeder calves sold in North Carolina graded sales, by sex, and their respective average weights and prices for the last seven years.
