

# 2001 North Carolina Fall Feeder Calf Sale Summary

The summaries are now available on line in pdf format at  
[http://www.cals.ncsu.edu/an\\_sci/extension/animal/market/Ahmarket.html](http://www.cals.ncsu.edu/an_sci/extension/animal/market/Ahmarket.html).

Feeder cattle production is an important beef enterprise in North Carolina. Graded sales continue to be viable alternatives for marketing these cattle and increasing profits for producers who choose to participate. These sales were initiated in North Carolina in 1952 and have operated each year since that time.

All cattle sold through these sales are graded by trained personnel from the Marketing Division of the North Carolina Department of Agriculture. Cattle are commingled in uniform lots of grade, sex, and breed, and penned with similar cattle in 100-pound increments. Steers sold through these sales must be properly castrated and healed, and all horned cattle must be dehorned and healed. Feeder calves must be vaccinated for Blackleg and Malignant Edema.

The following USDA Feeder Cattle Grade standards are used:

- L-1 - Large frame cattle with average or better thickness
- M-1 - Medium frame cattle with average or better thickness
- S-1 - Small frame cattle with average or better thickness
- LMS-2 - Variable in frame size with less than average thickness

Weights at which animals of various grades are expected to produce a Choice carcass are as follows:

Frame Size	Heifers	Steers
L	1150# and up	1250# and up
M	1000# - 1150#	1150# - 1250#
S	below 1000#	below 1100#

**RE: 2001 Fall Feeder Calf and Yearling Sale Summaries**

Across North Carolina this fall, a total of 15,608 graded feeder calves were sold in 18 sales, while only 184 yearlings were sold at a single sale in Asheville. These sales are designed to provide a marketing outlet for small to medium sized beef operations, where producers can co-mingle their calves into larger, uniform lots of similar type cattle. Increased lot size is critically important in the current beef cattle marketing system. Yearling cattle numbers in these sales have steadily declined since the late 1970's, indicative of a shift in both production and marketing systems for yearling cattle. Most existing yearling cattle producers sell their cattle farm-direct to feed yards through an order-buying network. Graded feeder cattle sales were initiated in North Carolina in 1952 and have remained a viable marketing alternative for commercial cow/calf producers since that time.

Please note that most sales now combine black and black/white-faced crosses in order to increase lot size and these pens are included in the breed called "Blacks". This change has reduced the percentage of cattle called "B&W Face" and has increased the percentage of cattle called "Blacks". Also note that most sales now include L-1 cattle with M-1 cattle for the same purpose and this change has reduced the percentage of cattle in the L-1 grade and increased the percentage of cattle in the M-1 grade.

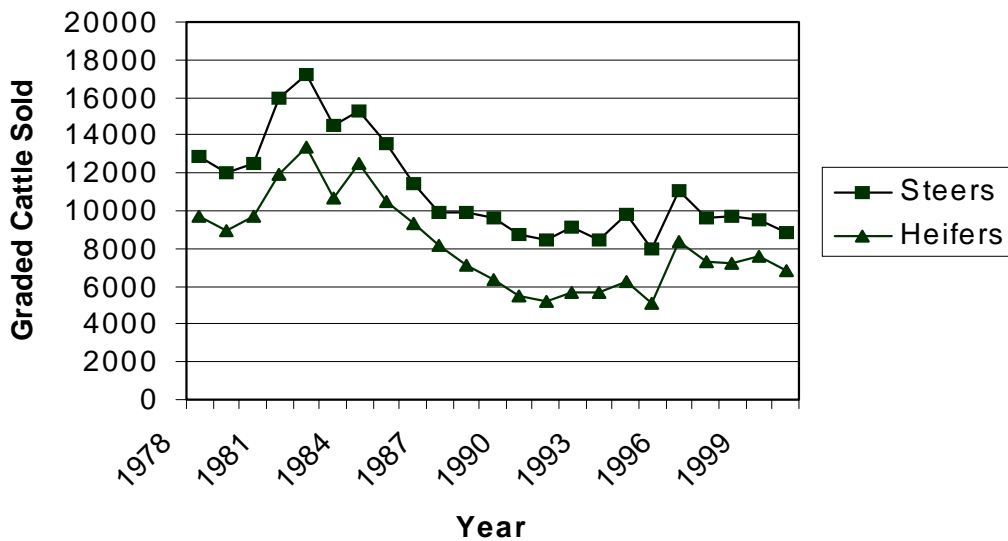

The following table details numbers of feeder calves sold in North Carolina graded sales, by sex, and their respective average weights and prices for the last nine years.
