ABSTRACT

Documentation data of herbarium vouchers examined and distribution of the taxa is presented for the manuscript on *Centrosema* submitted for the *Flora of North America* project.

The manuscript on *Centrosema* Benth. (Leguminosae: Phaseoleae: Clitoriinae) for the *Flora of North America* project has been submitted. Documentation of herbarium vouchers examined and distribution of the taxa is lacking. This data is published here in order to assist researchers with state floristic projects.

METHODS

Herbarium vouchers of *Centrosema* from North America were examined from 39 national herbaria and 6 foreign herbaria. All vouchers cited have been identified accurately and annotated. Complete label information is maintained by the author. Distributional data presented here was reduced to state, county, major site, collector(s) and number, and herbaria of deposit.

RESULTS

Distribution data for taxa is presented alphabetically by state, then by county, then by author. Authors with multiple collections are cited chronologically. Collection dates generally are excluded. However, some collectors lack a collection number (indicated by

s.n., *sine numero*) and made several collections from a similar locality (common 1800's to early 1900's). Also, a few collectors use the same collection number (e.g., *Ruth 400*) for different vouchers of a species. Dates are included in order to segregate voucher data and duplicates correctly.

States and counties have been bold-faced to quickly browse through the data. Locality data has been reduced using abbreviations presented in Table 1 for frequently cited geographical features. Standard map references (e.g., T33S, R28E, S18 - township 33 south, range 28 east, section 18) cited by modern collectors are included. Locality abbreviations used by collectors (e.g., Ind. Terr. - indian territory) were cited as presented on herbarium labels. Elevation and habitat data were excluded. I am willing to share complete data with researchers who need it.

Standard acronyms are utilized for herbarium voucher citations. An acronym followed by a number (e.g., FLAS-3) indicates the number of sheets of that voucher in the herbarium collection. Acronyms followed by a lowercase "m" (e.g., FLAS-m) indicate that the voucher has mixed material of two or more species. Occasionally, duplicates were distributed under one collection number to different herbaria that contained different species. All vouchers are cited with the misidentified vouchers preceded by the word "non" (e.g., GH,MIN, MSC,UC,US; non GA,ISC,K,WTU).

TABLE 1. Abbreviations used in citing locality data for *Centrosema* herbarium vouchers.
